TECHNICAL SKILLS

Cloud & Infrastructure: AWS (Lambda, S3, CloudFront, API Gateway, DynamoDB, IAM, CloudWatch, Route 53, Organizations), Terraform, IaC, AWS CLI

DevOps & Automation: GitHub Actions CI/CD, OIDC Federation, Docker, Kubernetes (EKS/AKS), Git, Playwright, Grype/CodeQL, SBOM, CloudFront OAC, S3 Lifecycle

Programming & Databases: Python, TypeScript/JavaScript, Bash, SQL, Node.js, REST APIs, MySQL, DynamoDB, MongoDB

Certifications: AWS Certified Cloud Practitioner, AWS Solutions Architect Associate (In Progress)

RELEVANT EXPERIENCE

Southeast Hypnosis

Houston, TX

Automation Engineer (Digital Transformation)

September 2021 – December 2024

- Architected end-to-end RevOps automation on GoHighLevel (HighLevel) - engineered custom CRM pipelines, scheduling logic, intake forms, and multi-channel nurture sequences with webhook/API integrations, eliminating 15+ hrs/week of manual admin and reducing client no-show rates by 30%+.
- Built and deployed an AI-powered inbound qualification system with chat widget, SMS/email follow-up workflows, and conditional logic to triage, nurture, and auto-book leads, increasing lead-to-appointment conversion and ensuring 24/7 response time.
- Migrated and re-platformed corporate website from SiteGround to high-performance WordPress stack (LiteSpeed caching, Cloudflare CDN, database optimization), improving page load speed by >60%, increasing uptime to 99.9%, and improving organic booking UX.
- Centralized and cleaned 300+ client records into a single source-of-truth CRM with automated tagging, compliance-safe data handling, and reporting dashboards, improving data integrity and enabling downstream automation and retention campaigns.

Office Manager

March 2020 – September 2021

- Managed end-to-end front-office operations (scheduling, intake, confidential client records, billing, and client communications) while auditing manual workflows for failure points, data loss, and time sinks.
- Partnered with ownership to map lead-to-cash bottlenecks and proposed CRM-driven automation roadmap for scheduling and intake, catalyzing promotion to Automation Engineer and full digital transformation.

PROJECTS

Serverless Portfolio Website | Live | AWS, Terraform, CI/CD, Astro, TailwindCSS, TypeScript September 2025 – November 2025

- Engineered multi-account AWS landing zone with AWS Organizations (Prod/Test OUs), MFA-enforced root, remote S3 + DynamoDB Terraform state, and \$0.01 billing anomaly alerts for cost governance and environment isolation.
- Implemented zero-secrets CI/CD via GitHub Actions OIDC federation with modular Terraform IaC, automated Playwright smoke tests, SBOM/Grype supply-chain scans, and CloudFront cache invalidation for zero-downtime releases.
- Built low-latency serverless backend (Lambda Python + API Gateway HTTP + DynamoDB atomic counters) for real-time visitor analytics, achieving <100ms p95 latency with graceful frontend fallback and scalable on-demand concurrency.
- Hardened security posture with IAM least-privilege, CloudFront OAC-only S3 access, AES-256 encryption, S3 versioning + lifecycle rules, and CodeQL scanning - documented in 6-part blog series and 4 architecture diagrams.

EDUCATION

University of Houston

Houston, TX

Bachelor of Science in Computer Information Systems

August 2020 – May 2025

- Cum Laude, GPA 3.5, Dean's List (3x); Active FITP member — tech workshops, competitions, & networking

VOLUNTEERING

Community Business Ambassador

November 2021 – May 2024

Greater Business of Pearland

Houston, TX

- Built and maintained attendee demographics dashboard in Excel from 1,500+ Eventbrite registrations to analyze audience trends and inform data-driven outreach, partnerships, and programming decisions driving measurable growth in event attendance.
- Served as Board liaison, producing executive-level meeting minutes, action items, and attendance reports for the Board of Directors to ensure governance compliance and operational follow-through.
